

CAN OPEN DATA ACCELERATE REGIONAL DEVELOPMENT?

OPEN DATA HUB AND SOUTH TYROLEAN EXAMPLES

Luisa Marangon

NATURE OF INNOVATION

A VERY (UN)NECESSARY INTRODUCTION

OPEN DATA ARE KEY INSTRUMENTS FOR:

transparency, innovation, economical development, public participation, efficiency in public services, scientific research, collaboration between different economical sectors.

MAIN INGREDIENTS:

Up-to-date data quality, open access, open standards, privacy and IT security, transparency, culture of sharing and collaboration between stakeholders, ethical use of Open Data

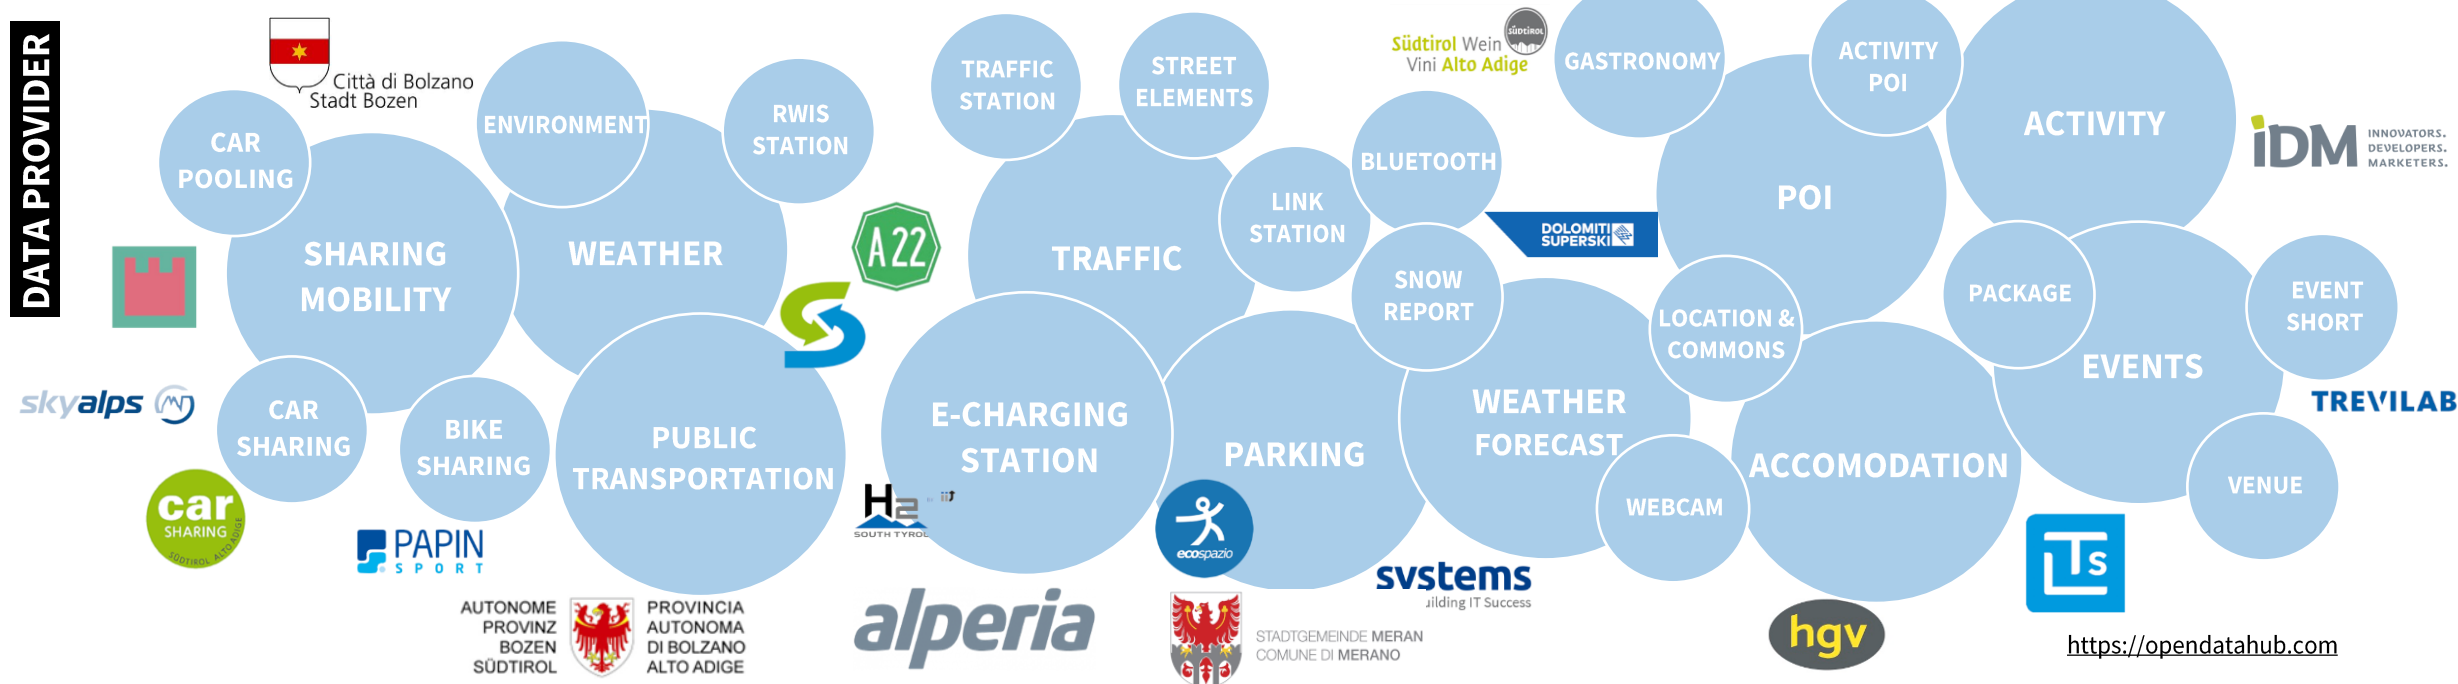

OPEN DATA HUB

DATA CONSUMER

OPEN DATA HUB

DATA PROVIDER

Develop digital solutions based on real data.

Open Data Hub is the **cross-border digital platform** that helps **start-ups, companies** and **research institutes** to develop digital solutions based on real data.

It connects data from different data providers and makes this data easily available for data consumers.

Data Providers

Registered Data Consumers

DATA ACCESS
understand how to build on open data

If you develop software applications we provide access to open data, through a **machine-readable**, documented and **stable channel**, to updated and **real-time data**, released under an Open Data licence.

DATA SHARING
share your data online

We help you to give visibility to your data, identify suitable formats, processing algorithms and licences and to use technologies known by application developers.

DATA VISUALIZATION
understand the potential of data

We help companies to test, visualise and get inspired by data to make their ideas concrete and valuable.

NUMBERS:

In 2023 there were over 3 million monthly requests for data access, while there are 500 sites and web applications that use the data available on the platform. There were 55 customers of the additional services offered by Open Data Hub.

CASE STUDIES

- **OBJECTIVE:** create a low-emission corridor on the A22 Brenner highway by reducing air and noise pollution
- **STRATEGIES:** dynamic reduction of the speed limit to improve air quality and reduce traffic during peak hours
- **MONITOR AND FORECASTING:** implementation of sensors and analysis of various data (weather, air quality, pollution, real-time traffic) through the Open Data Hub
- **MANAGEMENT:** Data collected are managed by the A22 Traffic Management Centre to optimize traffic flow during high seasons while staying within environmental limits.

- 
- A blue and white Skyalps helicopter is shown in flight against a clear blue sky. The helicopter's tail features a crescent moon and star symbol, and the website 'skyalps.com' is visible on its side. The background consists of a range of rugged, snow-covered mountains under a bright sky.
- **DATA AVAILABILITY:** Skyalps provides data on all its flights through the Open Data Hub, including times, destinations, prices, and live updates on departures and arrivals.
 - **BENEFITS FOR TOUR OPERATORS:** Integration of flight data into booking and tourism platforms enhance the users experience, allowing seamless travel planning from a single portal.
 - **SUPPORT FOR TOURISM PROMOTION:** Hotels and travel agencies can promote low-seasons tourism by offering holiday packages with direct flights
 - **REAL-TIME DATA FOR TRANSFER SERVICES:** Real-time flight data is beneficial for services like taxis, shuttles or concierge services provided by hotels, enabling them to adjust pickup times based on flight data.

- **LOCAL MOBILITY:** The agency for public mobility in South Tyrol STA includes various datasets from the Open Data Hub in the web and mobile application.
- **APPLICATION FEATURES:** Integration of local bus and train schedules, parking availability, bike rental stations opening hours, ticket purchase and validation through mobile ticketing.
- **USE OF DATASETS:** Real-time information for public transport schedules and cultural and touristic point of interest (POI) to enhance the user's experience
- **USER EXPERIENCE:** The app helps users – both residents and tourists – find routes from point A to point B easily, receiving notifications for any changes or updates, plan a multi-modal trip without using the car, perceive a higher accountability of the public transport system.

KEY RESULTS

Open Data made available by Open Data Hub in South Tyrol are beneficial for different Data Providers and Data Consumers.

• REPLICABILITY BEYOND THE LOCAL TERRITORY

1. BRENNERLEC

- The entire A22 Modena – Brennero motorway section could be affected by the application of the measures implemented.
- Conditions of the test section are specific to the Alpine region, therefore, motorways in Austria and Switzerland could also be evaluated.
- Extension to other national motorways.

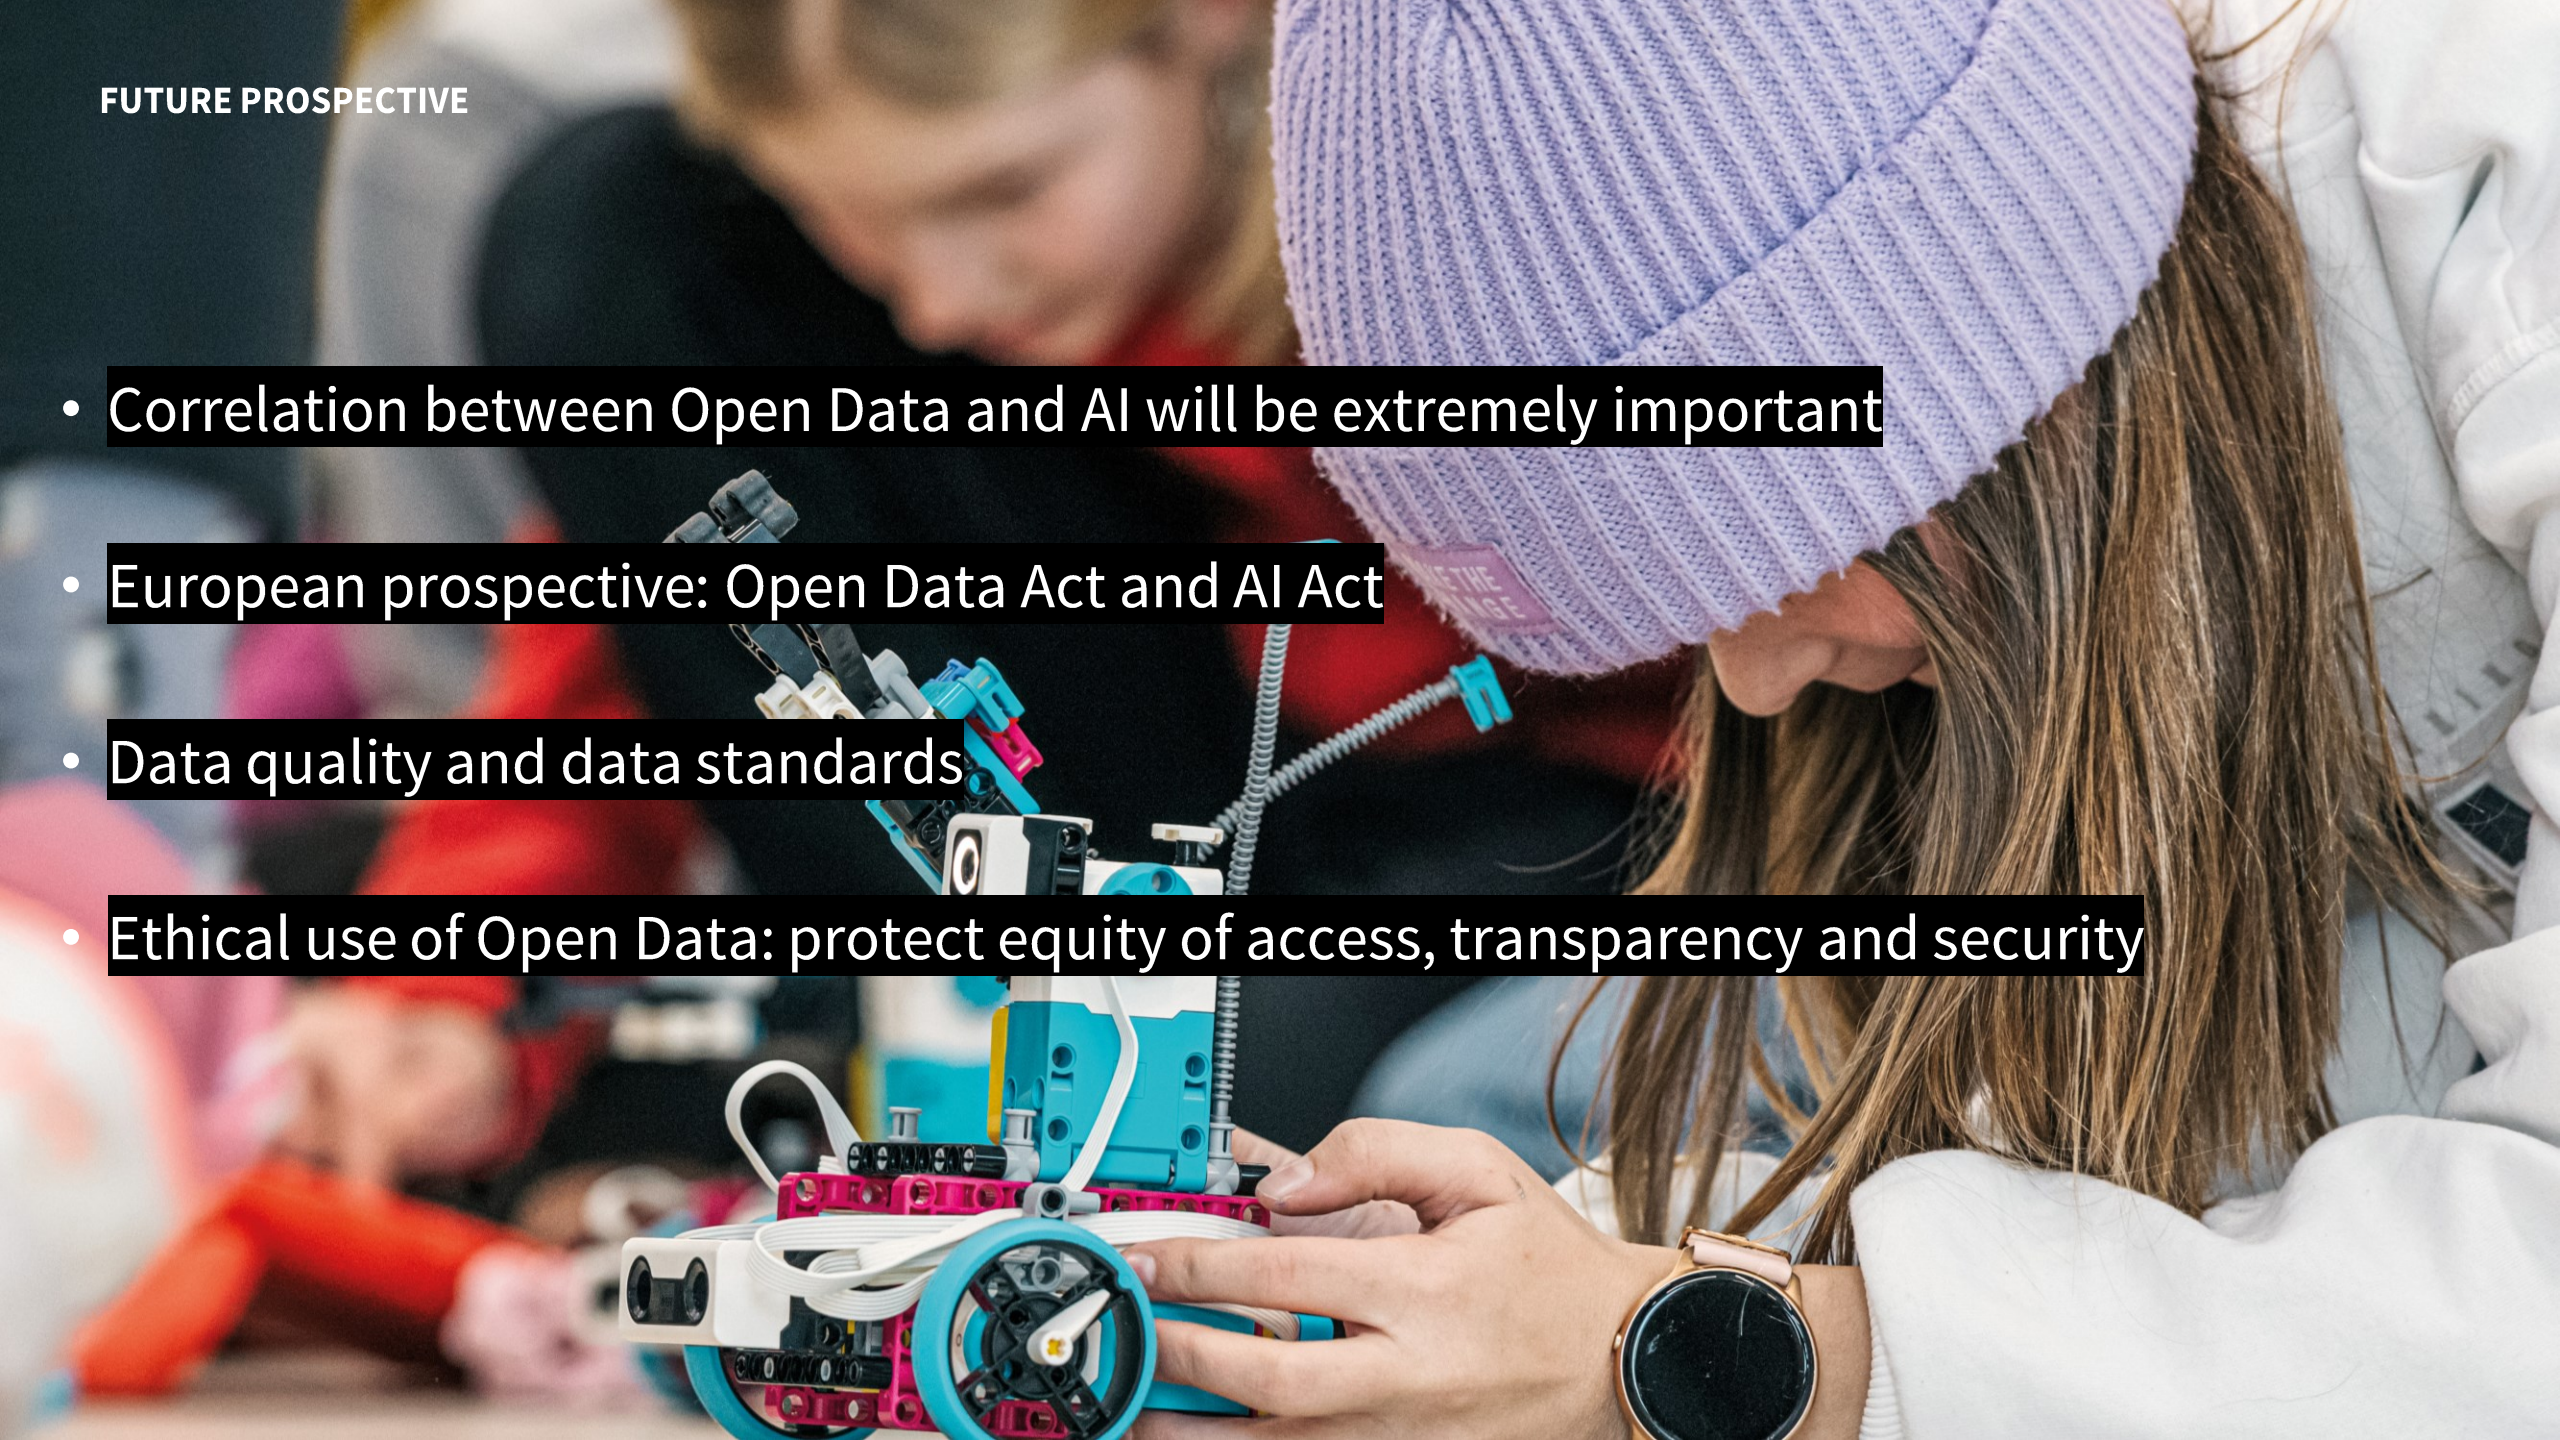

2. SKYALPS

- Regional airlines operating in a modest-sized airports can provide their planned and real-time flights data
- Small regional airports in tourist destinations could apply some of the solutions adopted in South Tyrol to solve any accessibility problems.
- Rise of private services by companies related to the tourism sector.

3. SÜDTIROLMOBIL APP

- Possibility of customizing the travel route, combining specific user needs and POI.
- Promotion of sustainable mobility by suggesting intermodal travel solutions.
- Personalized travel routes based on traffic prediction and traveler's need or habits.

- Correlation between Open Data and AI will be extremely important
- European prospective: Open Data Act and AI Act
- Data quality and data standards
- Ethical use of Open Data: protect equity of access, transparency and security

**CAN OPEN DATA ACCELERATE REGIONAL
DEVELOPMENT?**

CONCLUSIONS

- Open Data represents a strategic lever for the development of the territory.
 - Conscious use of Open Data can generate significant benefits in the creation of more inclusive and innovative communities.
 - Companies are encouraged to create new products and services to meet market needs.
 - South Tyrol is the perfect testfield for exploring innovative solutions on different scales.
 - Open Data Hub role is crucial for fostering Open Data and digital projects in the region and abroad.
- 

THANK YOU.
