

# Let's spark children's interest in coding

Our experiences and how you can contribute

8 November 2024 · SFSCon, Bolzano, Italy

Matthias Kirschner · President · [fsfe.org/about/kirschner](https://fsfe.org/about/kirschner) · [@kirschner](https://twitter.com/kirschner)

# Empowering users to control technology

- help individuals and organisations to understand how Free Software contributes to freedom, transparency, and self-determination.
- enhances users' rights by abolishing barriers to Free Software adoption.
- encourage people to use and develop Free Software.
- provide resources to enable everyone to further promote Free Software in Europe.

2048

**By 2048 young people love to  
tinker, experiment, and code with  
Free Software as the default**

outside

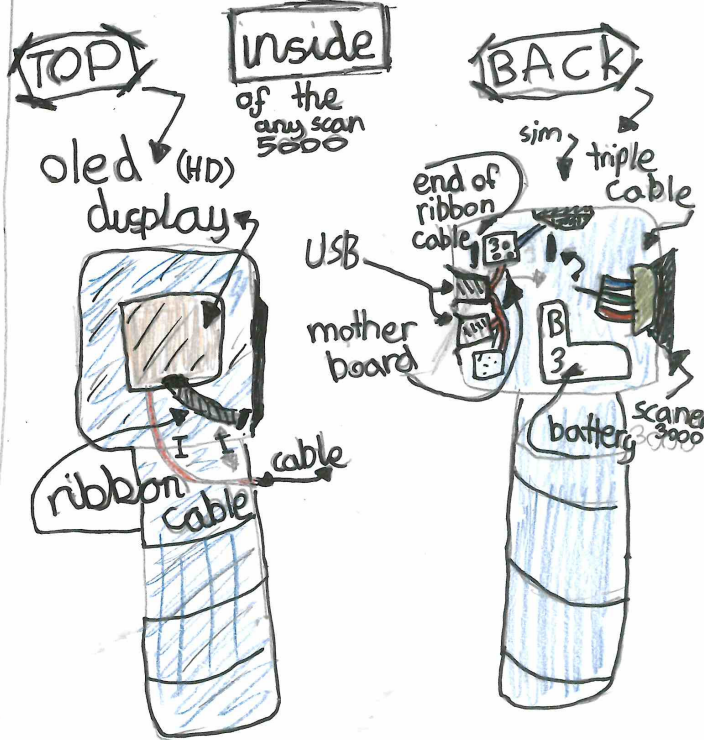

of the anyscan 5000

A machine that can scan any object, building etc... you name it

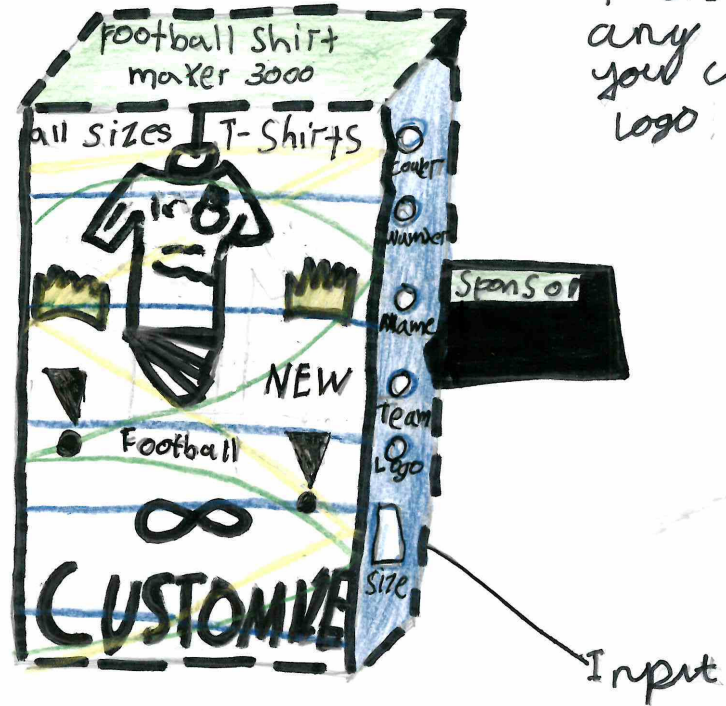

It can also show you on the screen what it looks like inside and out!

I would like to share my code to the world because the same way I love coding I would like to share my knowledge to the world

I would show the code because football teams can use it for their shirts.

This machine makes any football shirt you want you can even make your own logo and sponsors!
